

Google Toolbar with built in popup blocker.

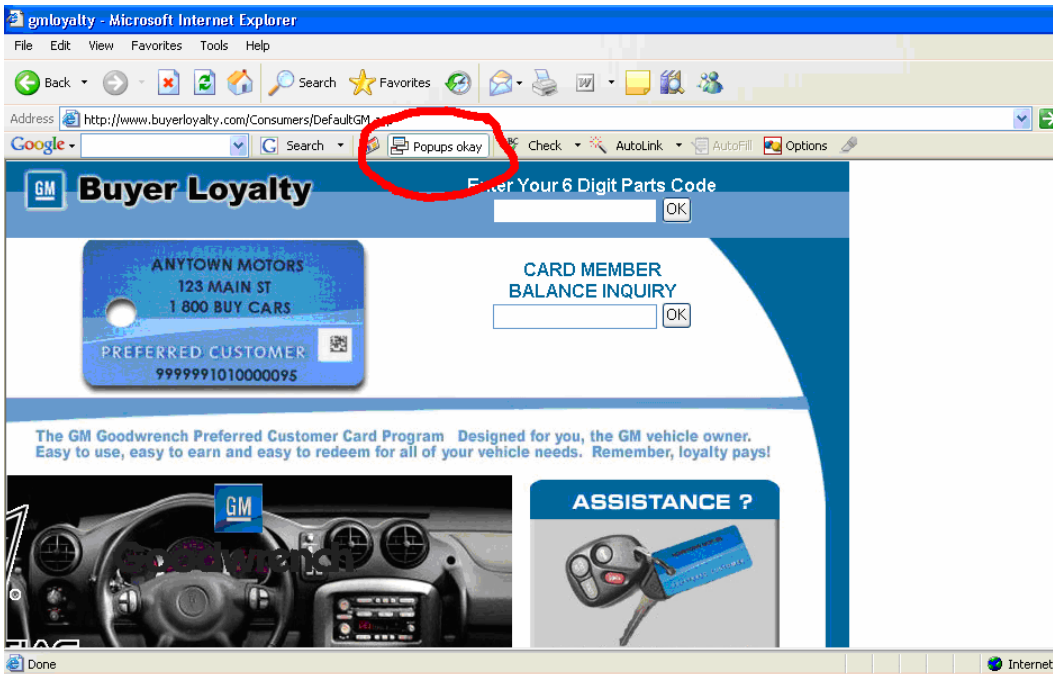

If a popup is blocked by the Google toolbar then you should see the icon below and hear a sound.

If you see the text that is circled in red below, then your Google popup blocker is active. Meaning it is stopping popup windows from being seen.

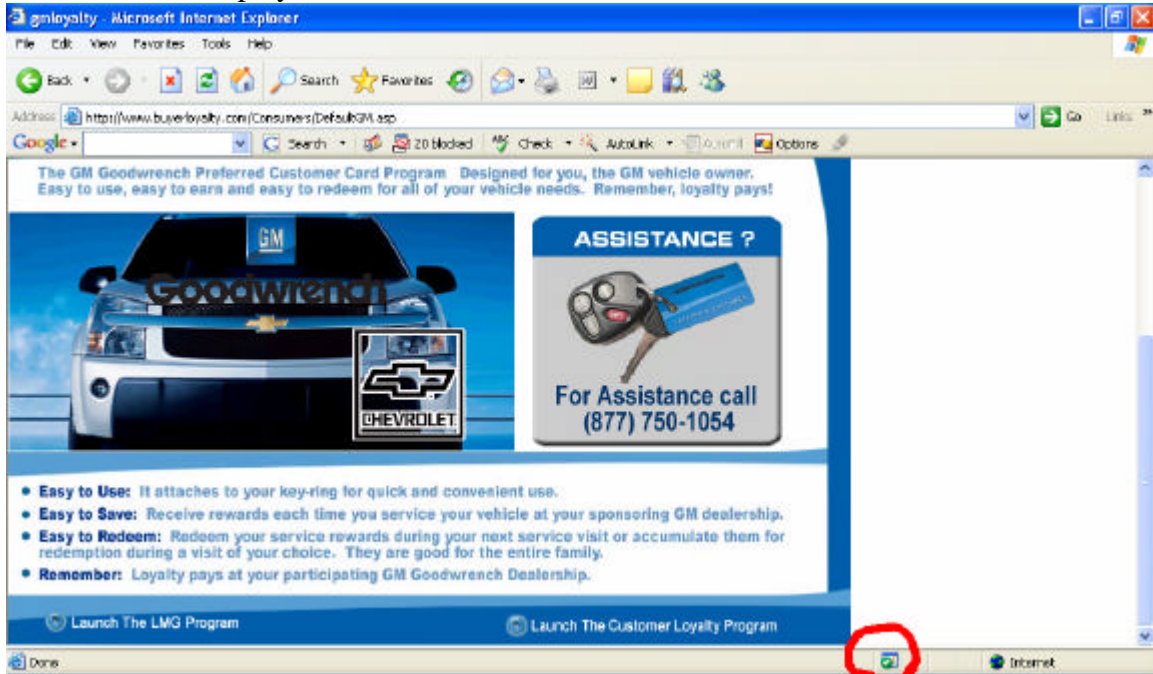

If your window looks like this on the other hand then your Google popup blocker is disabled. If you are having problems viewing popup windows scroll down to the section titled *Windows SP2 Popup Blocker*

To disable it Simply click on the word Blocked and it will change to look like the screen above with the words Popups okay displayed in the box. If you are still having problems please read the following section on how to disable Windows Service Pack 2 Popup blocker.

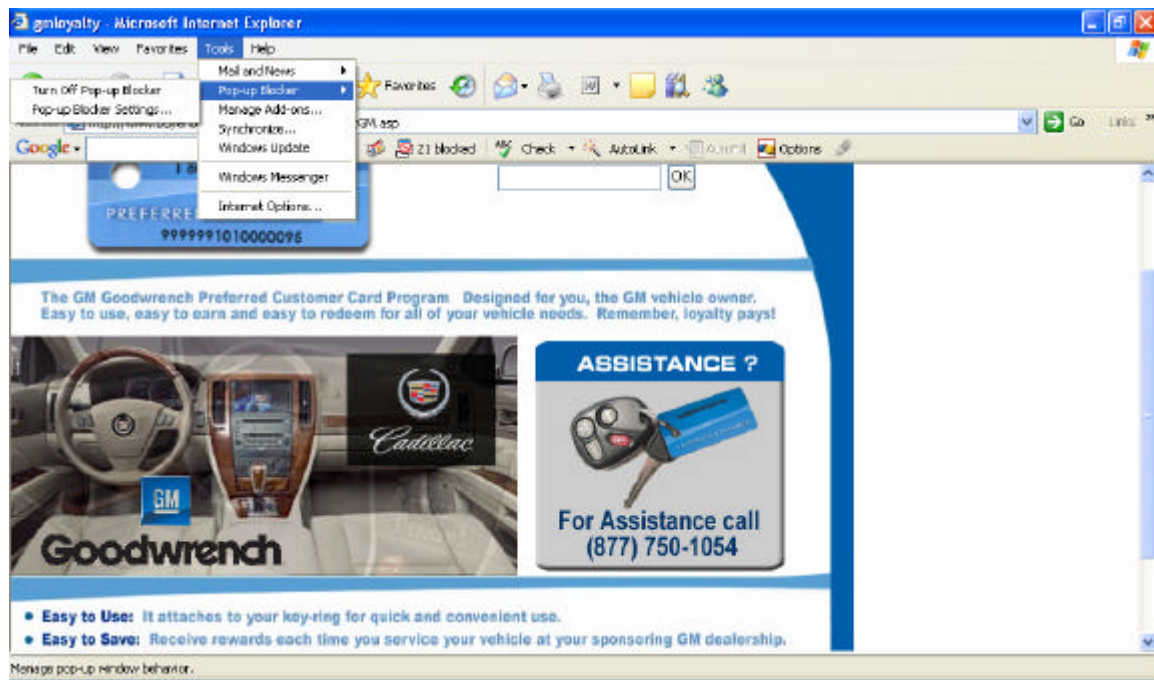

Windows SP2 Popup Blocker

Windows service pack 2 come with a built in popup blocker for internet explorer. If you see the icon that is circled in the screen shot below it means you already are allowing popup windows to be displayed on this page. If you on the other hand do not see the icon then you need to disable the popup blocker, or add the site to a list that allows popup windows to be displayed for that site.

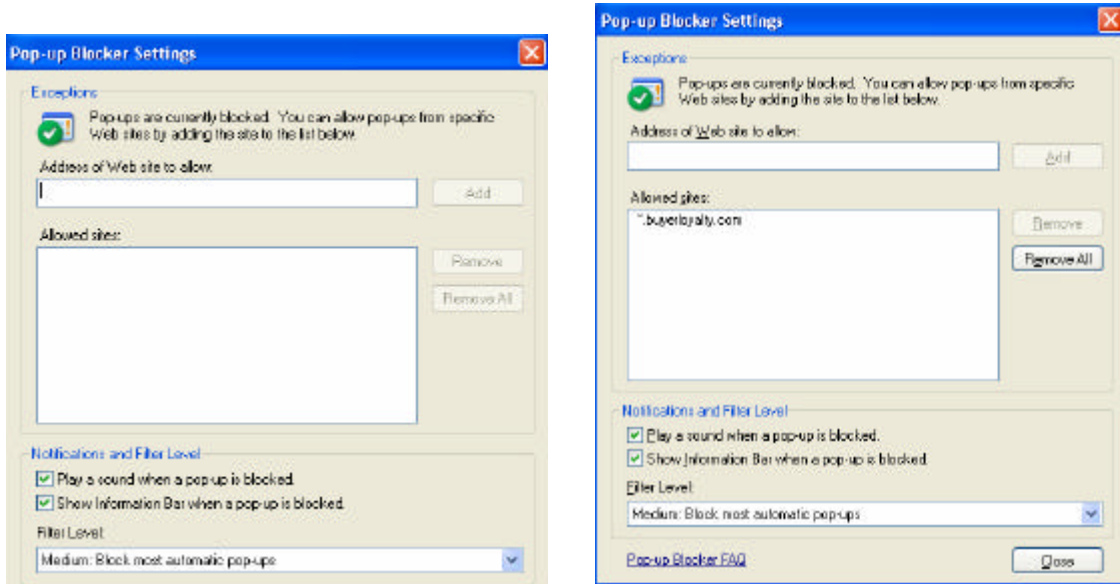

To disable the popup block or to add it to the list follow these steps. You can see the menu open in the screen shot below.

1. Open up internet explorer (you do not need to be at any particular page to complete the following steps).
2. Click on Tools
3. Highlight Pop-up Blocker
4. To disable the Pop-up Blocker Simply click on Turn off Pop-up Blocker. (If it says Turn on Pop-up Blocker then it is already turned off)
5. If you would like to keep it on but allow pop-ups to this site click on Pop-up Blocker Settings.

A windows will popup on the screen that looks like the one below. You may have sites listed in the Allowed sites: list.

6. In the Address of Web site to allow: dialog box type in www.buyerloyalty.com
7. Click the Add button which will be highlighted once you enter text in the box and

Now you can click on close and you will now be able to view popup windows successfully. However if you have other popup blocking software installed you may need to allow the site in those programs as well.
